NEW HOLLAND INTELLIVIEW™ 12 GUIDANCE KIT

UPGRADE YOUR CURRENT MACHINERY TO THE LATEST TECHNOLOGY

The New Holland IntelliView™ 12 Guidance Kit is designed to modernise machinery, bringing them up to the latest technology standards.

The kit offers added simplicity by using a single display for all operations, providing a unified user experience across your fleet and enables advanced automation and job sharing capabilities.

The New Holland IntelliView™ 12 Guidance Kit provides robust fleet and data management functionalities allowing proactive remote service and support from your local dealership.

SIMPLE

- One display experience across your entire fleet.
- Configure the IntelliView™ 12 to your choosing, tailor the tractor settings, screen layouts and user permissions to your operating preferences and experience levels.

SMART

- IntelliField™ provides job sharing capabilities allowing multiple vehicles to work in the same job, sharing data in real time.
- IntelliTurn™ works with IntelliSteer™ to provide hands-free steering for automatic, repeatable end-of row turns – maximising a vehicle's turning accuracy and overall efficiency.

CONNECTED

- Remotely monitor your connected fleet and digitally manage farm and agronomic field data as well as proactive remote service and support from your local dealer.
- 5-year connectivity and telematics included providing one-cloud experience and the benefits of real-time data transfer.

OPEN

- Receiver supports industry standard RTK signals.
- New Holland IntelliView™ 12 Guidance Kit allows you to work the way you want, on the machines you have.

WORKMASTER 40 LOADER + 4IN1 BUCKET

38HP | 3 CYLINDER ENGINE

THE VERY DEFINITION OF VALUE WORKMASTER™ 40 Compact tractors deliver outstanding value. This reliable, powerful, and easy-to-operate tractor helps you tackle your to-do list without breaking the bank. Torquey, large-displacement three-cylinder engines deliver, while still being quiet, fuel-efficient and minimising power loss in transmitting that 38HP to the PTO. Hydraulic output is perfect for loader use with a healthy 31.2 LPM. They're built tough to deliver trouble-free performance. This Spring, the best value tractor in our

range just got better with a Front End Loader Combo deal! Fitted with an APC24 Loader + 4in1 bucket, made tough in Australia and best in the business. Priced lean and mean and ready to master any work you want to throw at it!

- The rugged, 3-cylinder, diesel engine uses a cast-iron block and heavy-duty internal components.
- Reliable horsepower and excellent fuel efficiency with a 3 range Hydrostatic transmission.
- Hydrostatic Power steering.

TT3.50 LOADER + 4IN1 BUCKET

50HP | COMPACT & POWERFUL PERFORMANCE

The new TT3 tractor has been designed for Australian farms as its been designed with extensive feedback and input from farmers. Put simply, you could say the TT3 is a 'no-nonsense' machine for the budget conscious buyer. Characterised by smart design, rugged and robust construction, and efficient power, the TT3.50 delivers.

In order to meet the requirements of today's demands on a farm the TT3.50 delivers 50 horsepower, modern styling and unsurpassed performance in its class which makes it an ideal customer choice for value and versatility.

- Redesigned seat features include integrated suspension and extra cushioning for a smoother ride. The 'flip-up' armrests further enhances day-long comfort.

- The productive three-cylinder, 2.9 litre (S8000) FPT designed diesel engine packs a larger displacement and delivers greater power and efficiency thanks to it's large capacity fuel tank so you can work even longer before filling up.
- 2WD and 4WD options available with 8x8 Synchro shuttle mechanical transmission. A flip-up PTO Safety shroud and heavy-duty swinging drawbar with clevis complement the three-point linkage.
- Maintenance is easy with good under bonnet access, even with the class leading New Holland AP30 4in1 Front End Loader installed and the aggressive 9.5-24" 4WD front tyres.

HAYLINER SMALL SQUARE BALER

LEGENDARY PERFORMANCE AND RELIABILITY

75 years since the first New Holland balers arrived in Australia. New Holland is still producing consistent firm bales which is a major benefit of the Hayliner balers. The long bale chamber, allowing for a long plunger stroke, combined with the high plunger speed, ensures a 1st class quality bale formation. Hydraulic Adjustable top bale chamber rails and adjustable bale case doors allow for a perfect setting of the required density.

EQUAL BALES MADE FOR EASY STACKING

Large diameter pick-up and a side delivery feed system using rotor feeder and packer fork ensures that crop is gently and consistently packed into the bale chamber forming a quality bale. Side plunger knife gives perfect bale appearance in all crop types.

EASILY MAINTAINED

Hydraulic drawbar swing and pickup lift allow fast operation to change from road to field position. The knotters are easily maintained via an oil distribution system. *Hayliner 275 models only.

PRO-BELT 165 CROPCUTTER™ PREMIUM ROUND BALER

AVAILABLE IN A 190 CROPCUTTER™

The all-new New Holland, Pro-Belt™ premium round baler range delivers the performance and reliability that professionals and contractors can rely on.

MASTERPIECE IN THE ROUND

Pro-Belt 165 and 190 deliver solid and square shouldered round bales with impressive capacity from either the renowned SuperFeed™ or new 25 knife CropCutter™ large diameter rotor feeding systems.

DURABILITY BY DESIGN

- Pro-Belt round balers have been proven the world over with over 150,000 bales produced since it launched to market. The all-new heavy-duty drivelines, a more robust frame, and the re-imaged bale chamber deliver professional grade uptime and bales with high density.
- The latest precision farming solutions including ISOBUS electronics offers a simple user interface to track all baler functions and quickly adjust on-the-go, track individual bale moisture, and average bale moisture then make smart real time agronomic decisions.

*Delivery and service charges may apply.

SKID STEER L318 | L320

60HP | ROBUST AND STRONG

New Holland 300 Series skid steers are robust and strong. In addition to being reliable, all this with low fuel consumption, easy maintenance and reduced operational costs.

SUPER BOOM® BETTER STABILITY, HEIGHT AND DISCHARGE RANGE

As the loader arms go up, it moves the load forward, not back, toward the operator. Combined with a Larger Bucket Closure Angle; this provides better material retention and efficiency.

EXCELLENT WORK IN SEVERE CONDITIONS

Excels in restricted spaces with high performance and security. The longest wheelbase in the category, guarantees comfort and stability even on uneven terrain.

COMPACT TRACK LOADER C327

74HP | COMFORTABLE CAB

New Holland engineers used input from hundreds of customers to design our innovative line of compact track loaders.

BUILT AROUND YOU

Our industry leading bucket breakout force and dump angle provide fast cycle times and improve productivity.

OPERATING ENVIRONMENT

The Compact Track Loader has one of the widest, most comfortable cabs in the industry, giving you more head and foot room, and offering twice the visibility in critical zones.

SUPERIOR FEATURES

Keyless start, a Glide Ride option, available heated or air-ride seat and a self-levelling bucket feature.

MINI EXCAVATORS

16HP - 60HP | 6 MODELS AVAILABLE

Big digging power in restricted areas and congested work sites with D Series mini excavators. The dozer blade and auxiliary hydraulics are standard equipment to improve your bottom line.

ENGINE BUILT FOR EXCAVATION

New Holland D Series mini excavators come equipped with extremely silent Stage V engines. The E17D comes with 16hp and E25D comes with a 18hp engine built to excavate, grade and backfill with one machine while optimising fuel usage.

DIG WITH CONFIDENCE

SAE bucket breakout digging force with the E17D delivering 1500 daN and dig depth up to 2020 mm, while the E25D delivers 2200 daN and dig depth up to 2700 mm.

Designed for day-long working, each model has class-leading excavation performance with the versatility to power a wide range of attachments.
